Dear Mr. Keane and Family,

The trust you have placed in me and in RUSH means so much. Over the years, the generosity of the Mary Keane Research Fund has helped advance innovative approaches to understanding and treating epilepsy, bringing hope to patients and families affected by this complex neurological disorder.

What sets RUSH apart is our commitment to discovery and innovation. Through the support of the Mary Keane Research Fund, our team continues to investigate new ways to better diagnose, localize and treat seizures, with the goal of improving outcomes and quality of life for people living with epilepsy.

Your support has helped advance research within the Rush Epilepsy Center Multimodality Neuroimaging and Neuroengineering Laboratory, where we are developing sophisticated imaging and computational tools to better understand the brain networks involved in epilepsy. These efforts are helping move us toward more precise, personalized treatments for patients with difficult-to-control seizures.

This important work would not be possible without the vision and generosity of the Keane family. Thank you for partnering with us to advance epilepsy research and improve the lives of patients for years to come.

With heartfelt gratitude,

A handwritten signature in black ink, appearing to read 'Travis Stoub'.
